## **DETAILED ACTION**

### ***Response to Amendment***

1. This office action is in response to the amendment submitted on 08 August 2005. Claims 1-31 are currently pending.

### ***Claim Objections***

2. Claims 18, 20, and 29 are objected to because of the following informalities: In claims 18 and 29 the term "seleceted" should be -- selected --. In claim 20 the phrase "step step" should be -- step --. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 15, 19, 23, 27-28, 30 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 15, 27-28 and 30-31 it is unclear as to what the term "L" represents in the formula.

In claim 19 the phrase "the media" appears to lack proper antecedent basis.

In claim 23 the phrase "the pigment surface" appears to lack proper antecedent basis and also applicant refers to "washing agent" however no "washing agent" appears in claim 1.

Art Unit: 1755

In claim 30 the phrase "chosen from the group consisting of" is not proper Markush terminology. The phrase should be -- selected from the group consisting of --.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,890,380. Although the conflicting claims are not identical, they are not patentably distinct from each other because the reduction to practice of the claims of the prior patent would render obvious the instant claims.

It is the position of the examiner that the use of more than one pigment suspension would have been obvious to one of ordinary skill in the art as mixtures of pigments are well known in the art.

***Claim Rejections - 35 USC § 103***

7. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being obvious over Giger et al (US Patent No. 6,890,380).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2). It is the position of the examiner that the use of more than one pigment suspension in the process would have been obvious absent evidence showing otherwise as mixtures of pigments are well known in the art.
